International Forum to Advance
FIRST RESPONDER INNOVATION

Global Collaboration • Affordable Technology • Innovative Solutions

IFAFRI Stakeholder Engagement Committee Mission

To identify, cultivate and maintain relationships with key stakeholders, including first responders, industry and academia, to advance the goals of IFAFRI on behalf of the first responder community.

Stakeholder Benefits

+ Industry / Researchers

- Single source for vetted gaps
- Access to operators
- Responder-defined operational uses
- Market size and purchasing trends identified
- Starting point for technology development

First Responders

- More innovative technology available
- More effective, efficient and safe
- Pools resources and market
- Requirements given and voices heard
- Access to industry

The Public

- Global increase in capability to save lives and protect property

IFAFRI Stakeholder Summits

Objectives

- Inform stakeholders about IFAFRI capability gaps and potential global first responder market
- Incentivize industry and academia to pursue development of innovative and affordable technology
- Connect first responders with industry and academia to address IFAFRI capability gaps

About us

The International Forum to Advance First Responder Innovation (IFAFRI) is an organization of international government leaders focused on enhancing and expanding the development of affordable, innovative technology for first responders worldwide.

IFAFRI helps the world's first responders conduct their missions more effectively, safely, and efficiently by providing information that may influence the global market to develop affordable and innovative technology for first responders.

The organization is currently comprised of members from Australia, Canada, the European Commission, Finland, Germany, Israel, Japan, Mexico, the Netherlands, New Zealand, Spain, Sweden, the United Kingdom, and the United States. For more information on the International Forum to Advance First Responder Innovation, visit www.internationalresponderforum.org.
